WL BLIND BOX

The RMZ Wireline Blind Box is a solid metal tool used when heavy downward jarring is required. The tool is flat on the bottom and is used when boxing off wire at rope socket during fishing operations.

Application

- Can be used to clear an obstruction or to dislodge a stuck fish
- Sever wireline at the rope socket when a toolstring is struck or wire has parted downhole.
- Can be used to locate the fluid level in the well bore.

Features & Benefits

- One-piece solid design
- Connection options available to suit customer requirement
- Tapered design available
