WL UNIVERSAL BELL GUIDE

The RMZ Wireline Universal Bell Guide is designed as an alternative to the use of Bell Skirts. The guides eliminate the need to thread or weld to, the pulling tool or overshot body. The Universal Bell Guide offers the flexibility to interchange the size of centralizing Bell Guide efficiently. The base assembly consists of the Top Sub, Cylinder and Protection Sleeve, an extensive range of bell guides complements the base assembly.

Application

All wireline operation.

Features & Benefits

- Available to suit all industry standard pulling tool.
- Range of bell guides to suit each nominal base assembly.
- Available with a variety of threaded and quick lock connection.
- Improved tensile rating compared to threaded or welded skirts.
